

42

Day 00

Piscene C

Today's activities focus printing ascii characters (char) and integer values (int)

HOW TO CREATE A MAIN FUNCTION:

NOTE: before writing your main function. Include the path to the header file

Example:

#include "day00/includes/day00.h"

```
Int    main(void)
{
    // variables necessary to pass to the function in the activity you wish to test

    // function call for the activity you wish to test

    return (0);
}
```

HOW TO COMPILE AND RUN THE PROGRAM:

- Compiling the program:
 - **gcc** <path to [main.c](#)> <path to [activity.c](#)>

Example:

gcc [main.c](#) day00/ex00/ft_putchar.c

HOW TO RUN THE PROGRAM:

- Running the program:
 - Within the same directory you used to compile the program, us the following command:
 - **./a.out**

Example:

- **gcc** [main.c](#) day00/ex00/ft_putchar.c
- **./a.out**
